Metal Tag to Orchard Position — Planting Checklist

Dedicated field sheet for the Prairie Plants orchard grid

Rows: Start at the south end with R1 and work north toward R15.

Columns: Within each row, start at C1 on the west/windbreak side and work east toward C13.

Match: Use the exact metal **Tag ID** first. Tree name, code, and inventory row are cross-checks. When one Tag ID covers several trees, use the printed sequence for those otherwise identical trees.

Spot SiteRef: `CELL-Eoffset-Soffset` locates the listed orchard spot. Offsets are feet east and south from that master cell's northwest corner; `B10-E33-S35` is R6-C3. Codes stay with open spots for replacements, not with trees moved outside the orchard. See the master-grid guide.

Leave open: R8-C3 Pineapple (PR-Pineap) was reported dead October 11, 2026. Skip this spot for now; plant a new pear here in 2027 (variety not yet chosen).

Urban apples: AL-UrbGrn at R4-C9, AL-UrbR at R5-C9, and AL-UrbGld at R5-C10 were not planted in the orchard. Leave those spots open for new trees in 2027. The Urban apples are living trees planned outside the orchard; new grid locations are pending.

Already planted: R6-C3 is an M-111 apple rootstock (inventory row 56, tag AL-Rstk M111). Its checkbox is checked; a scion cultivar has not yet been recorded.
