Metal Tag to Orchard Position — Planting Checklist

Dedicated field sheet for the Prairie Plants orchard grid

Rows: Start at the south end with R1 and work north toward R15.

Columns: Within each row, start at C1 on the west/windbreak side and work east toward C13.

Match: Use the exact metal **Tag ID** first. Tree name, code, and inventory row are cross-checks. When one Tag ID covers several trees, use the printed sequence for those otherwise identical trees.

Spot SiteRef: `CELL-Eoffset-Soffset` locates the listed orchard spot. Offsets are feet east and south from that master cell's northwest corner; `B10-E33-S35` is R6-C3. Codes stay with open spots for replacements, not with trees moved outside the orchard. See the master-grid guide.

R4-C9: AL-UrbGrn not planted in the orchard; planned outside it (SiteRef PENDING). Leave this spot open for a new tree in 2027.

R5-C9: AL-UrbR not planted in the orchard; planned outside it (SiteRef PENDING). Leave this spot open for a new tree in 2027.

R5-C10: AL-UrbGld not planted in the orchard; planned outside it (SiteRef PENDING). Leave this spot open for a new tree in 2027.

R6-C3: M-111 apple rootstock (AL-Rstk M111) is already planted; its checkbox is checked.

R8-C1: PR-Pineap reported dead. Leave this spot open for a new pear in 2027.

R8-C3: Starking Hardy Giant - Asian (PR-Asian) is already planted; its checkbox is checked.

R9-C2: CR-Royalton reported dead. Leave this spot open for a new cherry in 2027.

R11-C10: PC-Hale reported dead. Leave this spot open for a new peach in 2027.
